.....  
“Audit Analytics has no peers. There's just no other data provider out there that can compare. I couldn't speak more highly of them.”

- Dr. Scott Whisenant  
University of Kansas

### Best in Class Data. Best in Class Support.

Quality data can be hard to obtain, requiring endless hours of research, time, and effort. With over 50 databases containing highly accurate, comprehensive, normalized, and structured audit and regulatory data, Audit Analytics makes it easy to:

- Leverage databases to examine audit, regulatory, and financial reporting trends;
- Integrate extensive data in class exercises and assignments;
- Support class instruction with interactive auditor and company profiles;
- Gain access to case studies or create your own;
- Stay apprised of current events;
- and more!

## More Data. More Opportunities.

Audit Analytics is the go-to source for independent research and data of audit, regulatory, and disclosure intelligence.

As a trusted source for research, our data is collected, organized, and analyzed with rigor by our expert team of researchers.

**Benchmarking + Due Diligence**

**Audit, Governance + Accounting Red Flags**

**Client Acceptance Best Practices**

**Financial Statement Analysis**

**SEC Filing Research**

“*Audit Analytics has been an outstanding resource for us.  
Everyone has benefited, both faculty and students.*”

- Dr. Thomas Calderon | University of Akron
